PROJECT DESCRIPTION

Supported by the Global Index Insurance Facility (GIIF), the International Finance Corporation (IFC) has been working with PT Reasuransi MAIPARK (national reinsurer of all special risks) to design and retail an index insurance product that protects the lending portfolios of banks from liquidity crises in the aftermath of an earthquake. This is relevant particularly for microfinance institutions (MFIs) and rural banks to be able to continue lending to communities when funds are most needed.

RESULTS AND IMPACTS

A new earthquake index insurance (EQII) product has been approved by the regulator in 2016, and is ready for the retail market. The insurance payout is triggered by a pre-determined earthquake parameter (Magnitude and Intensity), which is announced by an independent and established third party like the BMKG (Indonesia’s Meteorological, Climatological, and Geophysical Agency) or the USGS (the United States Geological Survey).

The idea is for the MFIs to buy insurance to protect their loan portfolios from potential liquidity crises after earthquake events.

NEXT STEPS

Sustained and creative market outreach; ensuring relevant product adjustments and pricing; and combining incentives with other products and financial instruments will all play a key role in achieving market scale and sustainability. IFC is working with MAIPARK to develop market awareness and educational materials, and will continue to reach out to financial institutions across Indonesia.
Global Index Insurance Facility is funded by 

**PARTNER FOCUS**

**Partner Information**
PT Reasuransi MAIPARK Indonesia is a special risk-insurance company owned by all licensed general insurance and reinsurance companies in Indonesia. It currently provides reinsurance coverage for earthquake, volcanic eruption, and tsunami risks.

**About Global Index Insurance Facility**
The Global Index Insurance Facility (GIIF) is a multi-donor trust fund that works to provide access to finance to smallholder farmers, microentrepreneurs, and microfinance institutions. GIIF supports the development and growth of local markets for indexed/catastrophic insurance in 31 developing countries, primarily in Sub-Saharan Africa, Latin America and the Caribbean, and Asia Pacific. The facility is part of the World Bank Group’s Finance & Markets Global Practice.
